METAL TREATMENT ADDITIVE

TVT is a highly advanced anti-friction metal treatment additive for use in the engine, transmission, power steering, wheel bearings and differential to improve engine (or machinery) life and increase power and fuel efficiency. It can be used in any type of lubricant such as oil, grease, transmission fluid and hydraulic fluid and is effective in both gasoline and diesel engines.

HOW TVT METAL TREATMENT WORKS

TVT is different from other additives on the market. It is an anti-friction metal treatment that interacts chemically with the metal and penetrates into the wear surface 3-5 microns. The metal penetration occurs as a result of the normal heat and pressure of an engine or of machinery. Reduced friction improves engine or machinery operation, lowers operating temperatures and reduces wear and tear on the metal components that cause engine or machinery component failure.

Exhibit A

TVT is not a lubricant but instead uses the existing lubricant as a carrier to get to the metal and reduce friction. When used as directed, TVT Metal Treatment Additive can dramatically reduce friction by up to 75%.

TVT does not coat the engine with resin or bonded film like other competing brands. It is a unique formulation of highly active friction reducing chemicals. There is neither any build-up on the metal surfaces nor any change in tolerances.

REASONS TO USE TVT METAL TREATMENT ADDITIVE

- Protects engine for up to 50,000 miles (add 4 ounces at each oil change)
- For engine, transmission, power steering and differential
- Extends engine life
- Reduces friction and engine wear
- Easier starts, protects parts during cold starts and warm-ups
- Extends interval between oil changes
- Better mileage, reduced fuel consumption
- Improves power and performance
- TVT pays for itself, more money in your pocket

SPECIAL OFFER

If you provide our order department with your personal email address so that we can send you information about our company and products you will receive a 10% discount off the regular price.

PRICING AS OF FEBRUARY 2002

Quantity	Price
55 Gallon Drum	\$3,157.70
35 Gallon Drum	\$2,510.10
5 Gallon Pail	\$422.75
1 Gallon Bottle	\$100.00

1 Quart Bottle	\$26.90
12 Ounce Bottle	\$12.95
